

Important: Read all instructions prior to installation.

Solar-Powered Deck Lights

Safety and Notes

- NOTE: Lights require a full charge cycle prior to initial operation.
- For outdoor use only.
- Not for underwater use. Do not use with submersible or pool/spa equipment.
- Light will shut off automatically in excessively cold temperatures (below minimum operating temp.) to protect the light.
- Solar panel must be cleaned at least every three months for best lighting results.
- Weather and physical obstructions that block sunlight will negatively affect the ability of the light to charge. Make sure the light is installed in a location where direct sunlight is present.

LFSD-WWBK-4PK

Specifications

Model	LFSD-RGBW-BUB-4PK
Operating Temperature	-10 to 40°C (14 to 104°F)*
IP Rating	IP65
Charge Time	Up to 5 hours of direct sunlight
Operation Time	10 hours (depending on mode)

*Lower end of this temperature range will affect battery life

Installation

1. Using the mounting holes as a guide, mark the location for drilling holes on the installation surface.
Note: Ensure installation location has adequate sunlight for proper charging.
2. Remove diffuser and switch to ON to initiate solar charging.
3. Drill holes for mounting and secure using included screws and anchors.
