## Track Light Canopy Accessory

### Safety and Notes

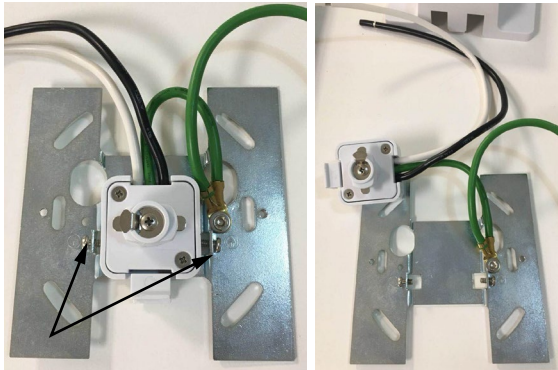

- **Warning:** When the adapter of the floating canopy is connected to the track, please pay attention to the fact that the spring piece is consistent with the copper strip in the track to avoid dangers such as short circuit, open circuit, and damages to the adapter.
- Disconnect supply power before beginning any wiring or installation.

### Installation

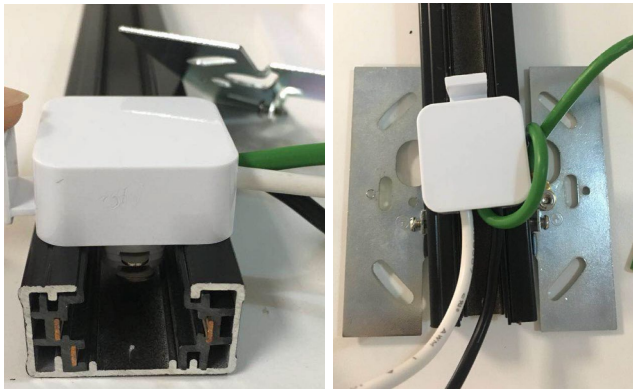

1. Loosen the screw and remove the cover.

2. Loosen screws on both sides to release mounting bracket.

3. Place the adapter of the floating canopy into the track, rotate the adapter, and fix it on the track.

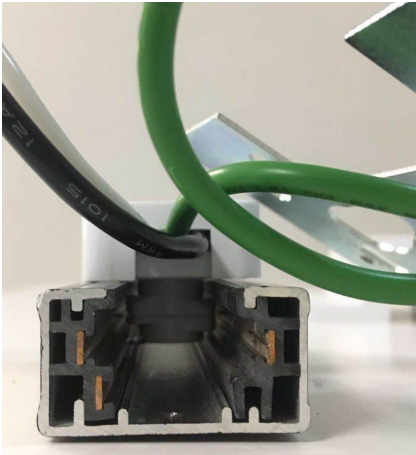

*Important: Read all instructions prior to installation.*
