1. Drill pilot holes for mounting screws and install mounting clips approximately 8" from ends of fixture. This will allow the fixtures to slide into position while still maintaining adequate support. Repeat for all fixtures in the run.
2. Snap fixtures in place. Make connections between fixtures using supplied butt connector or optional interconnects.
3. Use tube end cap to cover unused power connector on the last fixture in the run.
4. Connect powercord to 12–24VDC power source and plug into the first light in the run.
