Pre Installation Instructions

1. Read all safety notes and mounting guidelines before installing the product.
2. Verify that all parts are present and complete.
3. Verify that all power supply and charging systems comply with the specified voltage limits for the light.
4. Turn off the vehicle and disconnect the battery.

Installation Instructions

1. Open the the tailgate and locate the trim panel between the roll bar and rear of the vehicle.
2. Insert the plastic trim tool, pick tool, or flat head screw driver into the trim panel notch and lift to remove.
3. Use the 10mm socket wrench or ratchet driver and T40 Torx bit to remove the plastic fastener located under the trim panel.
4. Pull the stock light housing out. Slide the red lock tab on the light plug. Press down on the black tab and pull to disconnect from the wire harness.
5. Insert the JTL-JL light plug into the wire harness socket until it clicks into place and slide the red lock tab into the locked position.
6. Replace the light housing in the vehicle body.
7. Repeat steps for other tail light.
8. Reconnect the battery and apply power to test functionality.
9. Resecure the light housings with the plastic fasteners and replace the trim panels.

Required Tools[1]
