

Important: Read all instructions prior to installation.

Selectable CCT/Wattage Linear LED Strip Light

Wiring Diagram

100–277 VAC Input

0–10 V Dimming

Safety and Notes

- Product should be installed in accordance with applicable national, state, and local building and electrical codes.
- To reduce the risk of electric shock, ensure that the main power source and circuit breakers are switched off before performing any installation or wiring procedures.
- Avoid looking directly into the lamp when illuminated.
- Ensure all mounts are securely attached and will support the weight of the fixture. Failure to properly support the fixture may result in damage or injury, for which the manufacturer does not assume responsibility.

Check product label for specific electrical specifications related to installation.
Improper installation will void warranty.

CCT Selection

Use CCT selection switch to adjust CCT setting. Switch is located on the driver.

Installation Instructions (surface mount)

1. Measure and drill holes in mounting surface.
2. Remove diffuser lens using the releases pictured to the right.
3. Attach mounting plate. With supply power off, connect wiring.
Note: Conduit can be directly attached to mounting plate.
4. Select desired CCT/wattage values using switches on driver.
5. Securely mount fixture.
6. Reinstall diffuser lens.
