

PRODUCT DESCRIPTION

KRAV extrusions are not construction extrusions! They are designated exclusively to illuminate glass or acrylic.

Patent Number: US D809,704 S

- Easy and secure mounting to panel edges
- Convenient installation of LED strips
- Dedicated for panels with a thickness of 0.31"-0.39" (8-10 mm)

FINISH :

Silver anodized

Fill empty fields

Date	

TECHNICAL SPECIFICATION

Application

- edge illumination of transparent and frosted panels

Assembly

- installation using self-adhesive tape and clasps

Additional information

- the extrusion is a lighting fixture, not a structural element

KRAV extrusions are not construction extrusions! They are designated exclusively to illuminate glass or acrylic. Therefore, assembly, suspension, or other technical activities related to the panels should be performed using standard elements. Complete KRAV 810 extrusion consists of 2 extrusions: KRAV-D810 dedicated for mounting LED tape up to 10 mm (0.39") wide and KRAV-Z810 extrusion – the closing extrusion. Additionally the extrusions are equipped with mounting adhesive tape and a silicone strip that assures a solid connection of the two extrusions.

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.
