

Important: Read all instructions prior to installation.

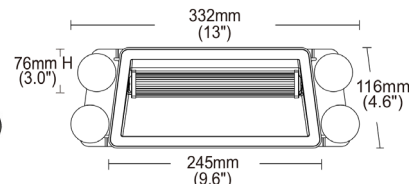

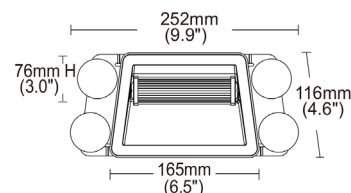

DSTRB-x-x

LED Dash Strobe Light

Safety and Notes

- **Avoid Direct LED Exposure:** Do not look directly into the LEDs while they are operating, as this may cause temporary blindness or eye damage.
- **Voltage Compatibility:** This light operates at DC 12-24V, ensuring it suits various vehicle power systems.

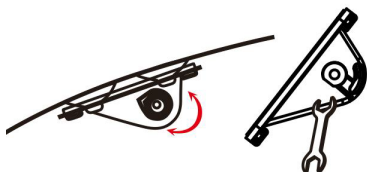

Working voltage	12 or 24 VDC
Operating Temperature	-30-60 °C (-22-140 °F)

Mounting Installation

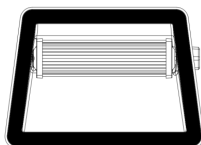

Suction Cup Installation

1. Clean the windshield surface thoroughly.
2. Attach suction cups to each side of the light and position on windshield.
3. Adjust the lighthouse angle. Tighten the side screws using a wrench.
4. Connect the cigarette power cable to a 12-24 VDC power source.

Adhesive Sticker Mount

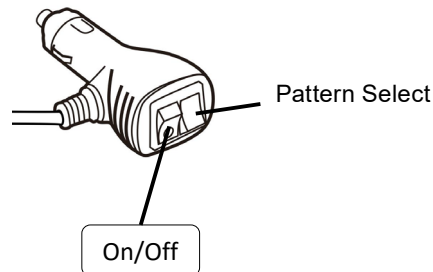

1. Clean the windshield surface thoroughly.
2. Cut adhesive stickers to fit the light's edges.
3. Apply the stickers to all four sides of the light.
4. Press the light firmly onto a clean, level windshield surface.
5. Connect the cigarette power cable to a 12-24 VDC power source.

Flash Pattern Selection

Changing Patterns:

- Quick Press (under 1 second): Advance to the next flash pattern.
- Hold 1-3 seconds: Go back to the previous pattern.
- Hold 3-5 seconds: Reset to the first pattern.
- Hold over 5 seconds: Switch to low-power mode; hold again to return to high-power.

Dual-Color Version:

Note: In dual-color mode, Color 1 and Color 2 can only flash alternately; they cannot flash simultaneously.
