Important: Read all instructions prior to installation.

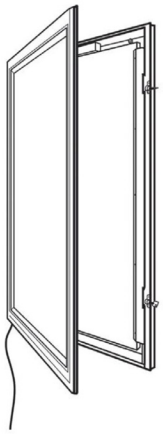
Slim LED Outdoor Light Box

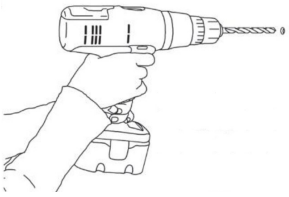
Included Parts

1 - Outdoor LED Light Box
1 - Power Supply and Cord with 1-15 Plug

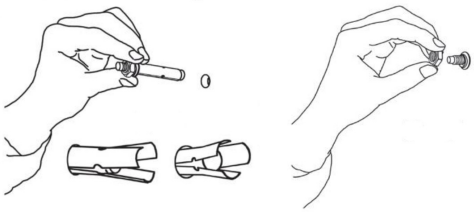
Note: This panel operates on 24 VDC. The included power supply and cord is intended for 120 VAC input only.

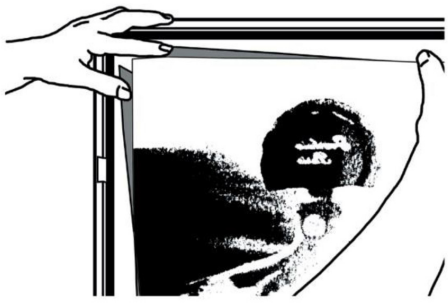
Installation Instructions





1. **Mark Frame Position on Wall.**
   Hold frame in position on wall. Check to make sure frame is level (construction level is recommended). Snap open frame sides to expose mounting holes in frame. Mark hole position through the mounting holes.
2. **Drill Holes for Wall Anchors.**
   Using a drill with proper drill bit size appropriate for the wall anchors, drill the holes.
3. **Install Anchor and Bolts**
   Push anchor bolts into drilled holes. Tightening the nut on the anchor forces anchor to spread out inside the wall for a secure fit.
4. **Hanging Light Box on Wall Anchor Bolts**
   Through the mounting holes in frame, hang light box over the anchor bolts. Install washers and nuts an tighten with a wrench.



Print installation


5. **Mounting Poster Materials**
   Unlock door and swing frame open. Posters mount inside the door of frame. Thin magnetic strips on all four sides of frame hold poster securely. Center poster in frame, lift magnetic strip and over the edge of poster. Magnetic strips clamp down to hold poster in place.
